

# Percipere ELEVATE for Finance

Powered by SAP Cloud Technology

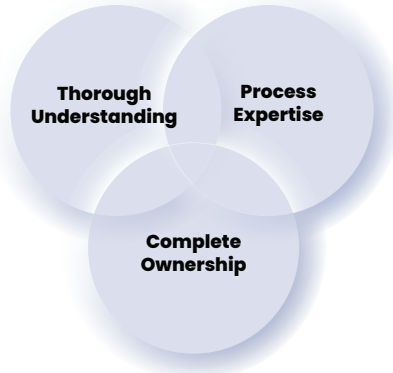

## Who We Are

Leading process integrators who provide holistic, end-to-end solutions that truly live up to our name.

A team with in-depth and extensive hands-on experience with IA & ERP implementations and emerging technologies to enable you to maximise benefits on your transformation journey.

We are data and business process experts who handhold you through your enterprise digital transformation journey.

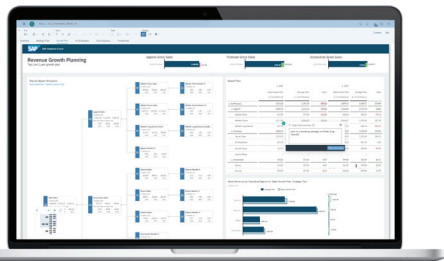

We go beyond ERP implementation and empower you to create future-ready businesses using RPA and Process mining.

## Benefits of Percipere ELEVATE for Finance

A horizontal row of ten circular icons, each containing a different symbol related to finance and operations, such as a clock, a balance scale, a gear, a target, a magnifying glass, a bar chart, a globe, a smartphone, a line graph, and the SAP logo.

- What-if and predictive analytics**
- Powered by SAP Cloud Technology**

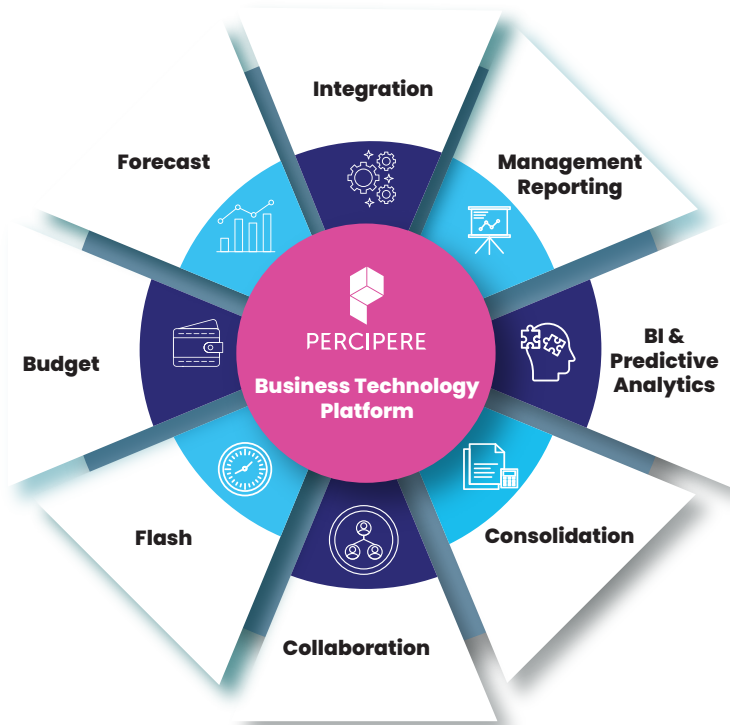

“Percipere showed us they were the team that we could trust. Not only are they professional and experienced with ERP implementations, they demonstrated the confidence that we needed to see as we start our digital transformation. They understand our challenges and are implementing solutions that will make us more efficient and give us a strong foundation for continued growth.

**Matt Woolhouse, Finance Director at OS Doors**

# Transactional Accounting and Finance

## Collaboration

- Report Publishing & Commentar
- Sharing stories & Data
- Integration with third-party Applications
- Working across all lines of business in a single environment

## Flash

Integration with your ERP enables your finance team to deliver faster and more accurate flash numbers. Through version management and line item detail, measure the accuracy of your flash and understand how your numbers change throughout the month end

## Budget

Reduce the planning effort with an out of box set of budgeting templates, calculations, ratios and dashboards. Take your budget to the next level with robust planning features such as advanced formulas, allocations, value trees and calculations

## Forecast

Accelerate and integrate through a single platform for actuals, forecast and scenario modelling. Leverage machine learning with Predictive Planning and Scenarios to simulate the impact of changes and to validate financial forecasts

## Integration

SAP provide a comprehensive suite of tools and services designed to connect diverse systems, applications, and data sources seamlessly. Including 2,000 pre-built integration packages and intelligent automation.

## Management Reporting

Report with confidence, all levels of the enterprise. Publish & burst print ready financial statements, commentary and management packs available real time on any device. With savings up to 50% spend more time changing the business and less time crunching the numbers.

## BI & Predictive Analytics

Gain real time insights with self-service dashboards, reports and Smart analytics. Empower your teams to make the most of new opportunities, react faster to challenges, while engaging more closely with customers, suppliers and employees.

## Consolidation

Take control of the consolidation process with our best practice, pre-configured consolidation model. Compliant with IFRS & GAAP, deliver a faster, more accurate financial close & reduce the month end process by up to 35%
