

FUTUROOT

Democratising Process Mining

Enterprise-grade process intelligence built for mid-market speed and scale.

How Well Do You Know Your Processes?

Business Processes

Hidden Variations

- ·Manual Workarounds
- ·Compliance Exposure
- ·Migration Risk
- ·Working Capital Leakages

Your business growth pivots around how your processes actually work, not how you assume they do. However, traditional process assessment methodologies are expensive, slow, specialist-driven and have low business adoption. FUTUROOT changes that!

FUTUROOT: Democratizing Process Mining for the Mid-Market

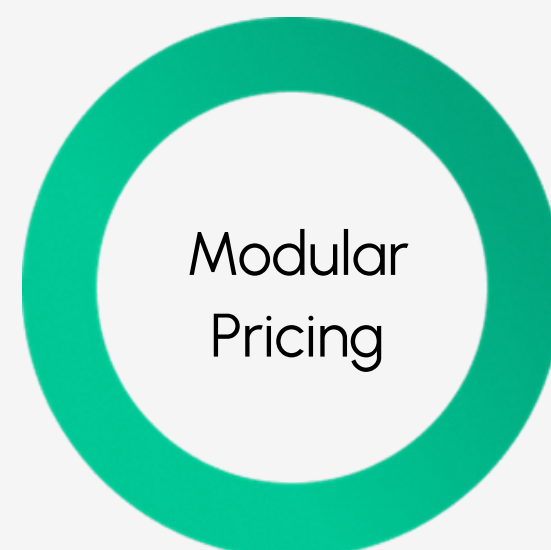

200,000+ companies between \$100M–\$1B need sophisticated process mining without enterprise complexities. FUTUROOT was built to deliver:

Enterprise-grade intelligence

ERP Native Accuracy

Modular Pricing

"Impressed with the tool and capabilities and the quick turnaround time for ERP."

ALVAREZ & MARSAL

"The package story really explains the thing so well."

EY

"One of the better UIs I have seen in Process Mining platforms. The functionality."

BARINGA

A Process Mining Platform Built by ERP Implementors

1

Built to Scale

Well scoped.
Right-sized.
Stress tested.

2

ERP Behaviour & Extractions

We extract relationships and industry KPIs competitors don't know exist because we've configured these systems hundreds of times

Generic connectors for all Versions of SAP

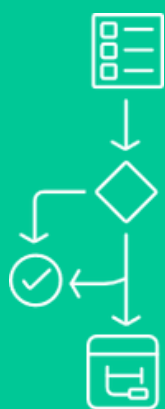

300+ KPIs across Finance, supply chain, Procurement, sales, finance, audit, mfg., quality, and many more

Works Across 4 Major ERP Systems

3

Hyperscaler + ERP Knowledge + BI = Analytics[^]Focussed Problem solving

Action Engine:

Triggers approval Workflows, updated PO Status, escalates exceptions

4

Benchmark, Don't Just Map Built-in feature.

Compares performance against industry standards, not just process alignment.

5

When to Ignore Deviations

Intelligent classification. Distinguished between process noise and true anomalies for focused action.

6

Continuous Influence

Leveraging insights from our in-house. Advisory panel for ongoing refinement.

7

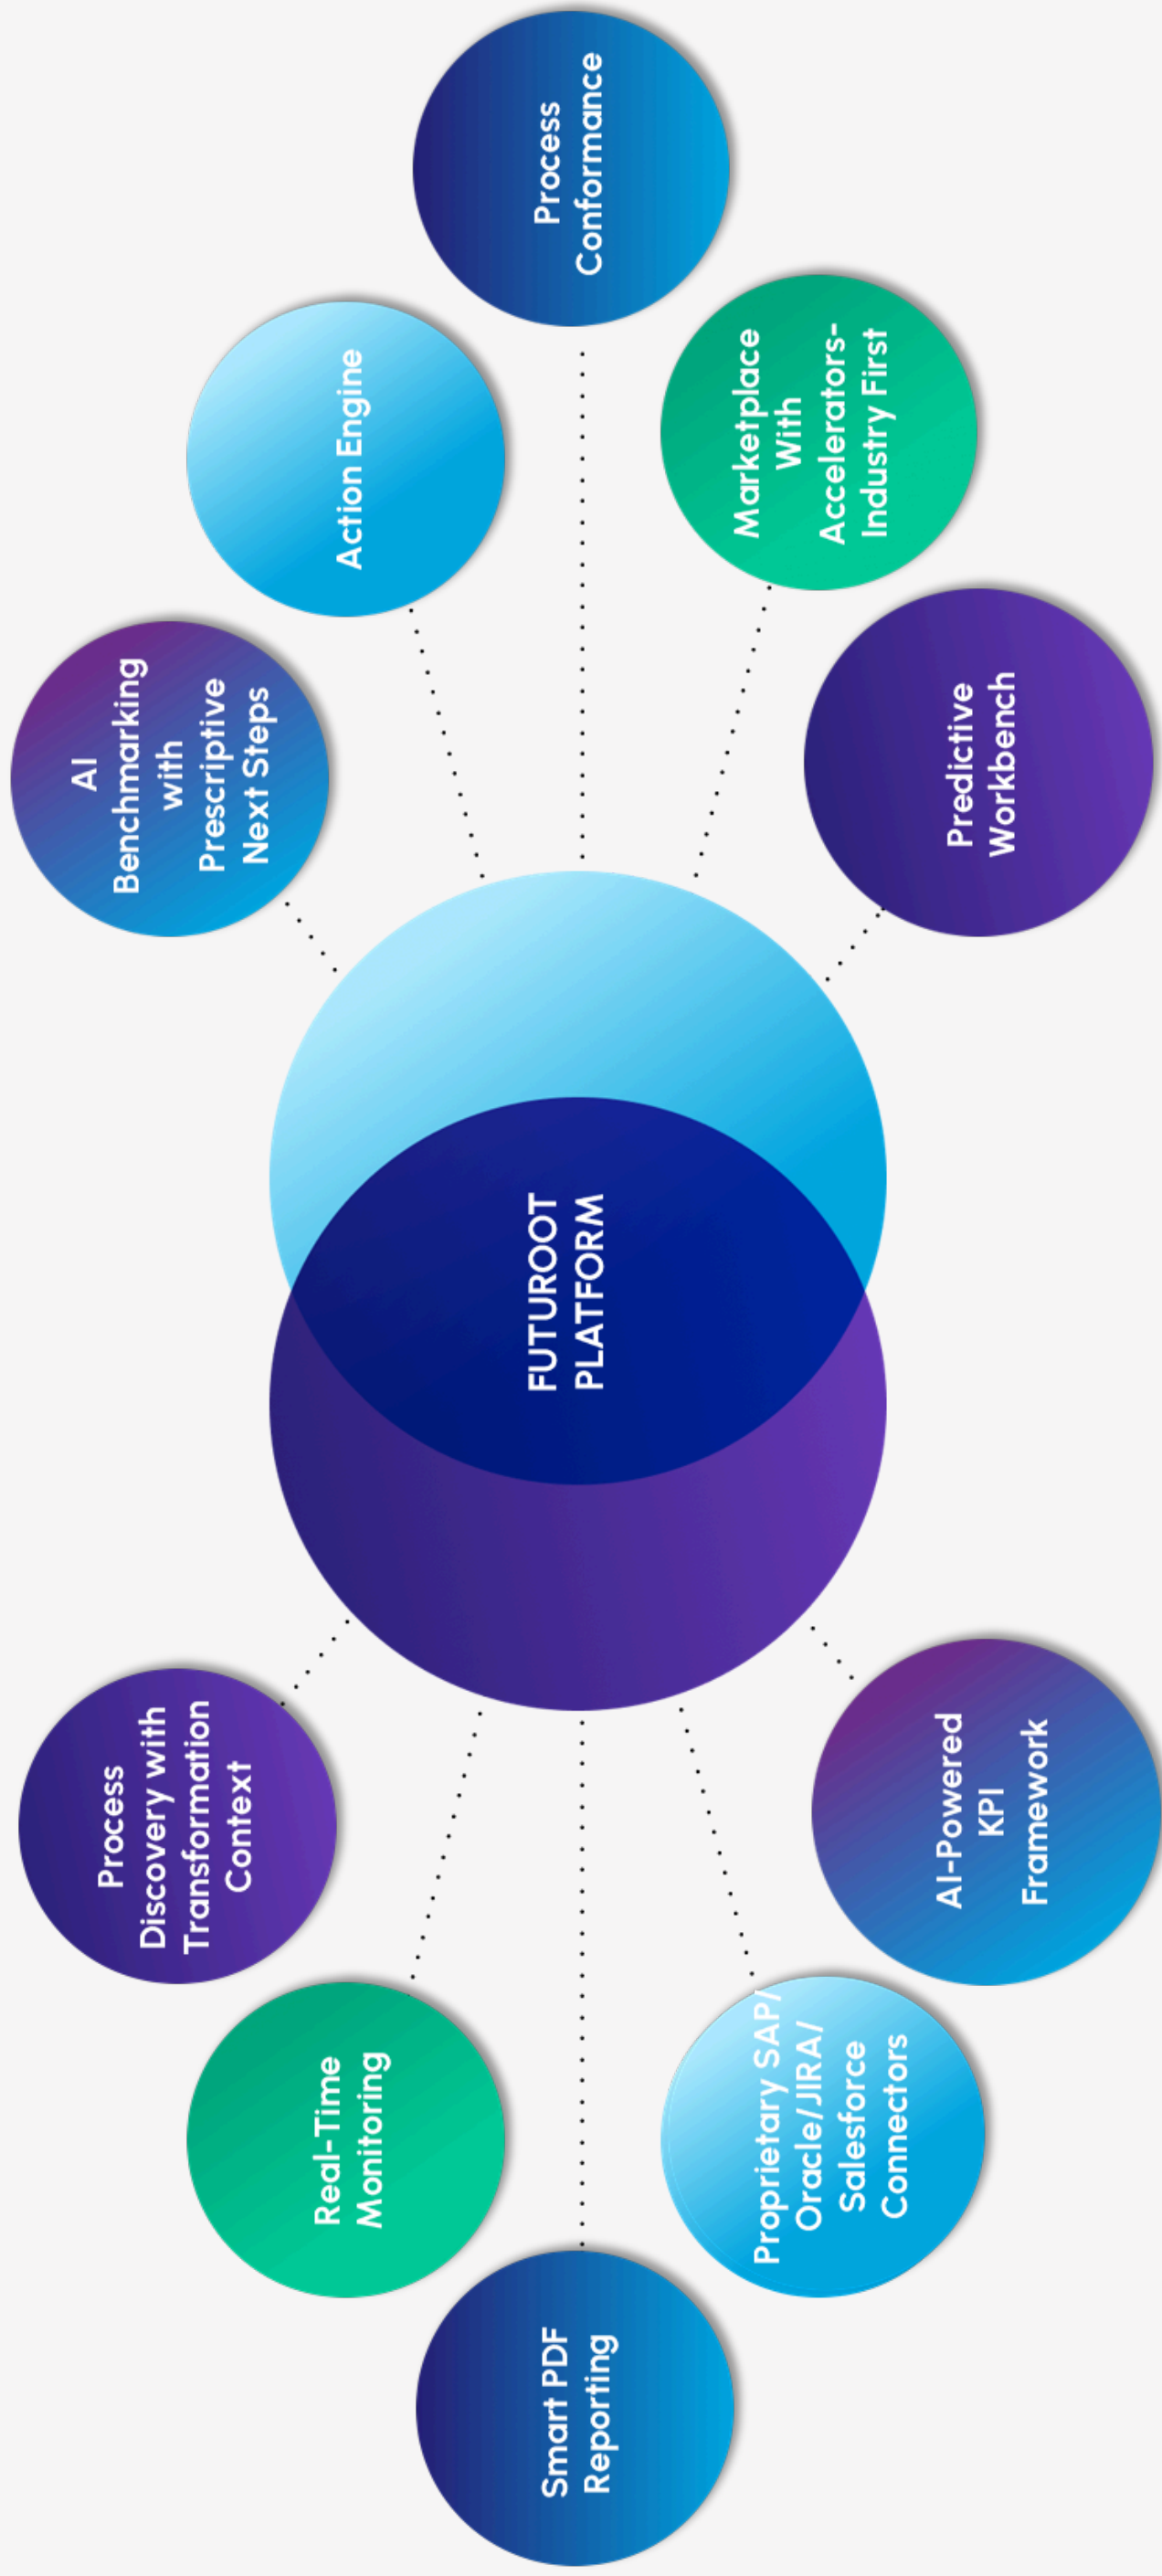

Cost Intelligence

System flexes to identify cost-saving opportunities beyond standard analysis.

8

Enterprise Ready From Day 1

Infrastructure & Governance | Integration

Hosting & Compliance

- AWS Hosted
- Dedicated Tenant per customer
- SOC2 and ISO 27001:2022
- Quarterly Security Tests
- Continuous monitoring and review

Business Continuity

- Automated hourly Backups
- Autoscaling with multi-AZ option

Data Security

- Data encrypted in DB
- HTTPS/TLS for web application
- SHA-256 for extraction
- Role Based Access
- MFA for DevOps

Data Sizing

- 1.25 million cases (18 months data)
- 8 events per case
- 33 dimensions
- Process Map average load times 5 to 7 sec
- Dashboard with 5-7 KPI, average load times with caching - 3 to 5 sec
- Use of columnar DB – upcoming release

Customer Proof

Challenge

- Complex P2P processes before major ERP transformation
- Procurement and inventory management inefficiencies
- Risk of migrating broken processes to new system
- Needed hard ROI case for transformation investment

Impact

- Process Complexity : 15,409 variants identified vs. assumed, 66% data reduction: 80,000 → 27,000 materials
- Invoice Automation Opp. : 46-day bottleneck, resource concentration in 53% of clearances
- Supplier Performance: 38.62% late delivery rate identified, two mills accounting 14K+ late deliveries.
- Controls Roadmap: circa 15% segregation-of-duties violations.

Renewable Power Capital

Challenge

- Just completed its SAP S/4HANA Public Cloud implementation
- A post-implementation validation to ensure process discipline

Impact

- 6 weeks: Time to insight (vs. 8-12 weeks standard)
- 100%: Transaction coverage (~820POs, £222M+ procurement value annualised)
- 12%: Proportion of PO value with process exceptions
- 2: Process fixes implemented during engagement
- 50%: Faster than traditional consulting delivery

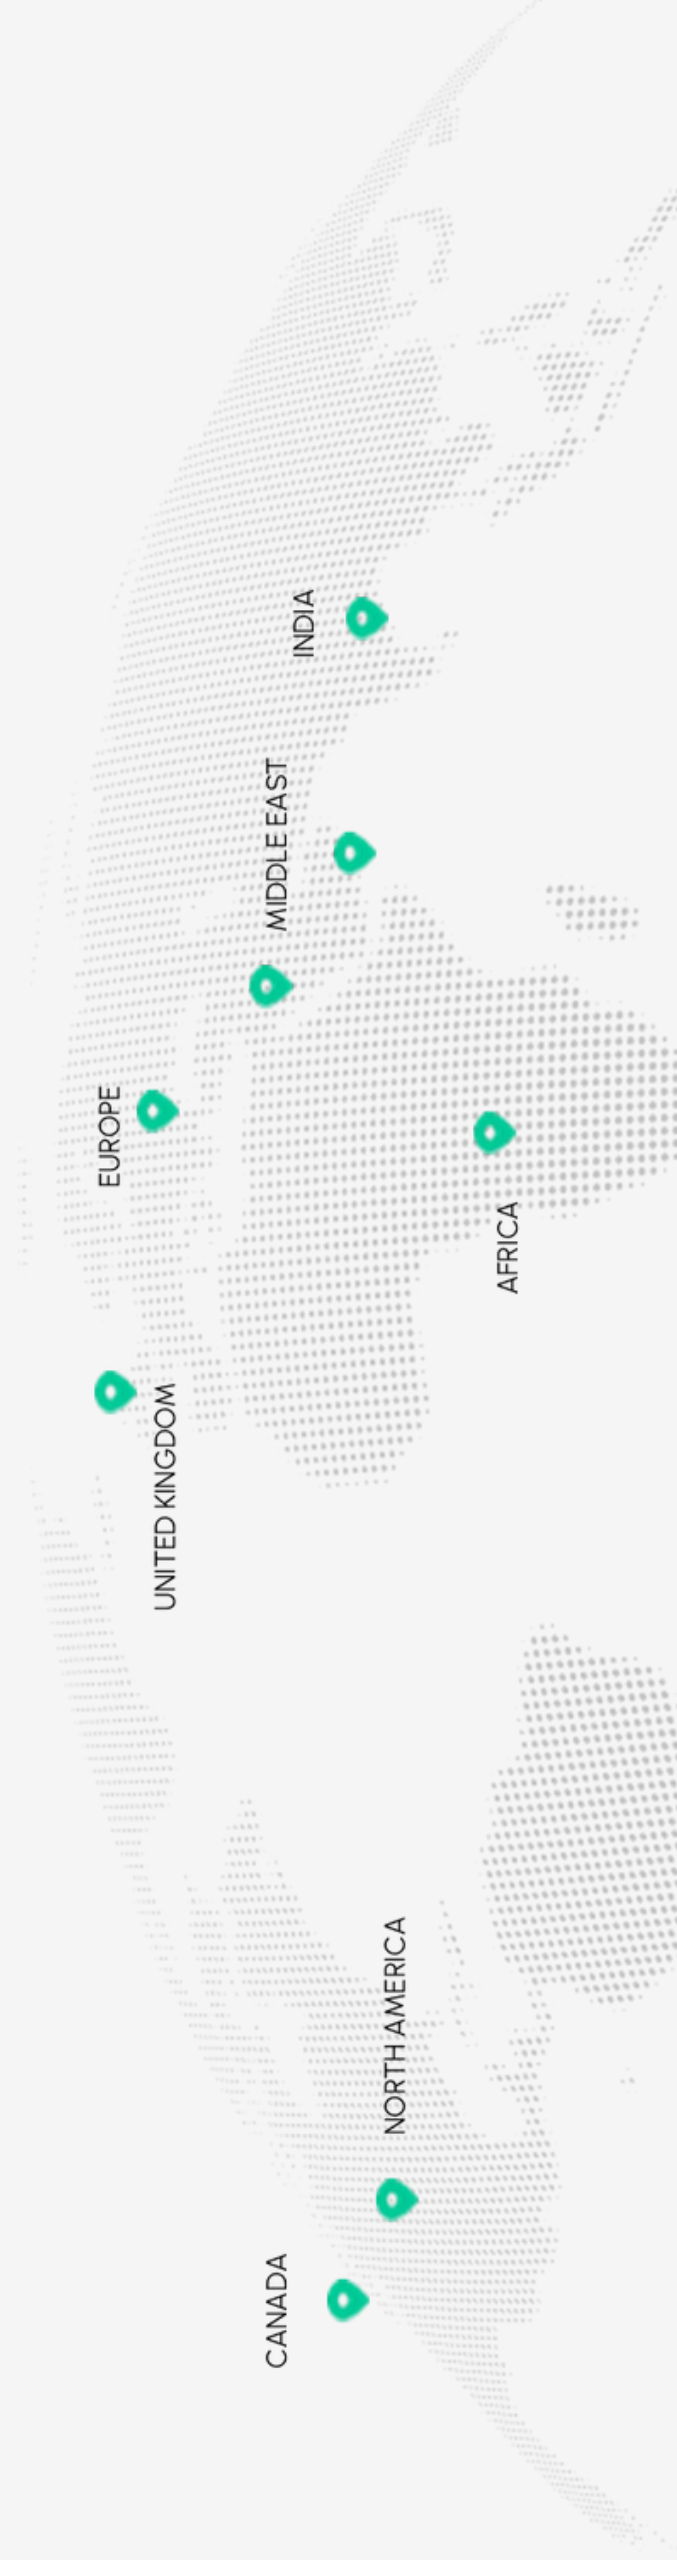

"As a CFO, I can't rely on 'I think' or 'we believe' when it comes to financial controls. FUTUROOT Control Tower showed me critical points of bypassing controls, where bottlenecks existed, and how much was at risk. That's the kind of intelligence that drives real remediation. Six weeks from insight to action."

Michele Pietch, RPC

An Unparalleled Advantage

Incepted in the UK in 2017 | An award winning SAP Gold team | 500+ Yrs Combined Experience across ERP, AI and Automation Implementations in 50+ countries globally | Operate at the intersection of technology, people and processes | FUTUROOT since 2019-20

Healthcare/Pharma

Manufacturing

Food/Beverage

Energy

Unparalleled diagnostics & SAP relationships
