

Job Description

Job Title- SAP BW/4 HANA Consultant

About us: Established in 2017 in the UK, Percipere is a Cloud ERP and enterprise technology consultancy operating across the UK, Middle East and India. We implement SAP Cloud ERP and Acumatica, extend solutions through our proprietary technology and AI ecosystem and support customers beyond go-live. Our expertise spans manufacturing, wholesale and distribution, finance transformation, project-led engineering and construction, and selected financial services organizations. We deliver complex, high-value transformation programmes to senior finance, operations, supply-chain and technology leaders across global markets. We have ambitious growth targets and this role will be pivotal in helping us achieve them.

Job Location: Mumbai

Experience: 6+ Years

Role: We are seeking a highly skilled and technically strong SAP BW/4HANA Consultant with hands-on expertise in SAP BusinessObjects Data Services (BODS) and SAP Business Data Cloud (BDC). The ideal candidate will be responsible for designing, developing, optimizing, and supporting enterprise data warehousing solutions while ensuring seamless integration between SAP BW/4HANA and cloud-based data platforms.

The consultant will play a critical role in supporting strategic customer engagements by delivering robust data extraction, transformation, reporting and analytics solutions.

Key Responsibilities:

- Responsible for tracking key project activities at a detailed level including administrative items associated with a complex technical SAP deployment.
- Proactively monitor and troubleshoot daily/ periodic data load failures across both SAP BW/4HANA Process Chains and BDC data streams.
- Formulates recovery plans or assessing impact if not recoverable and escalates as appropriate. Design, develop, and maintain SAP BW/4HANA data models, Info Providers, ADSOs, Composite Providers, and Open ODS Views.
- Develop and optimize ETL/data loading processes using SAP BW tools.
- Create and enhance HANA Calculation Views, Attribute Views, and Analytical Views.
- Build and manage data extraction from SAP and non-SAP source systems.
- Perform data modeling, data warehousing, and reporting solution development.
- Work with business stakeholders to gather reporting and analytics requirements.
- Develop and support SAP BW Queries and reporting solutions using SAP Analytics Cloud (SAC), SAP BO, or other reporting tools.
- Monitor and optimize system performance, data loads, and query execution.
- Conduct unit testing, integration testing, and support UAT activities.
- Troubleshoot production issues and provide ongoing support.
- Prepare technical documentation and knowledge transfer materials.
- Collaborate with cross-functional teams including SAP Basis, ABAP, Functional Consultants and Business Users.

Required Skills & Qualifications

- 6+ years of BW/4HANA and atleast 2 years of Business Data Cloud (BDC) implementation and support experience.
- Design of seamless data pipelines connecting SAP BW/4HANA with Business Data Cloud (BDC) environments.
- Develop complex Info Providers, Advanced Datastore Objects (ADSOs), Composite Providers, and Open ODS views.
- Should have technical understanding of SAP logistics, Finance modules/ tables/ views/ extract structures.
- Should have good understanding of SAP ABAP.
- Should have good understanding of SAP BODS, SLT, or SDA/SDI.
- Optimize query execution, data tiering strategies, and cloud extraction throughput to minimize latency.
- Expertise in SAP Analytics Cloud is an added advantage.
