

Job Description

Job Title- SAP Project Manager

About us: Established in 2017 in the UK, Percipere is a Cloud ERP and enterprise technology consultancy operating across the UK, Middle East and India. We implement SAP Cloud ERP and Acumatica, extend solutions through our proprietary technology and AI ecosystem and support customers beyond go-live. Our expertise spans manufacturing, wholesale and distribution, finance transformation, project-led engineering and construction, and selected financial services organizations. We deliver complex, high-value transformation programmes to senior finance, operations, supply-chain and technology leaders across global markets. We have ambitious growth targets and this role will be pivotal in helping us achieve them.

Job Location: UK

Experience: 7-10 Years

Role: This role will be responsible for regularly managing SAP projects including integration points with other enterprise efforts. In addition, oversees status reporting, issue tracking, and project communications. Develops and maintains effective relationships with various stakeholders. Promotes ongoing process enhancements to achieve continuous improvement.

Key Responsibilities:

- Responsible for tracking key project activities at a detailed level including administrative items associated with a complex technical SAP deployment.
- Monitors plan and highlight anticipated issues or slippage.
- Key Stakeholder management – Conduct Operating and Steering Committee Meetings at regular frequencies.
- Formulates recovery plans or assessing impact if not recoverable and escalates as appropriate.
- Records and monitors project actual costs vs. project budget.
- Responsible for proactively identifying variances to plan and developing appropriate mitigation plans.
- Builds consensus among team related to project scope, task execution, staffing and issue resolution.
- Provides clear and reliable communications to internal teams, project stakeholders, external vendors, and customers.
- Holds self-accountable for meeting expectations and requirements of customers.
- Shows ability to learn new tools and processes.
- Evaluates new or changed tools and processes to fit within the projects managed.
- Integrates timeframes and processes for completing project.
- Ensures the quality and integrity of project work products.
- Maintains quality service by establishing and enforcing organization standards.
- Motivates team by explaining priorities and objectives.
- Engages in effective brainstorming and brings creative ideas to the workplace.
- Has good judgment regarding which creative ideas and suggestions can improve our business and implement identified solutions.
- Adheres to and analyses project/program policies processes, standards, governance, and metrics.
- Determines the best approach for the projects being managed.
- Make recommendations for improving efficiency, product delivery and expense reduction in projects.

Required Skills and Qualifications:

- Minimum 7 to 10 years of Project Management experience. Preferably as SAP Project Manager in (S/4HANA, ECC, ByD)
- Having SAP experience in past in any module will have more weightage
- General knowledge of SAP or ERP deployment activities.
- PMP/PRINC2/Agile Scrum certification is not mandatory but will have more weightage
