

Job Description

Role: SAP EWM Consultant

Location: Mumbai, India

Job Type: Full-time

About Us: Established in 2017 in the UK, Percipere is a Cloud ERP and enterprise technology consultancy operating across the UK, Middle East and India. We implement SAP Cloud ERP and Acumatica, extend solutions through our proprietary technology and AI ecosystem and support customers beyond go-live. Our expertise spans manufacturing, wholesale and distribution, finance transformation, project-led engineering and construction, and selected financial services organizations. We deliver complex, high-value transformation programmes to senior finance, operations, supply-chain and technology leaders across global markets. We have ambitious growth targets and this role will be pivotal in helping us achieve them.

Experience Required: 4-6 Years

Role Requirement: We are looking for an experienced SAP Extended Warehouse Management (EWM) Consultant with 4–6 years of relevant SAP EWM experience, including strong exposure to SAP S/4HANA implementation projects. The consultant will be responsible for participating in end-to-end SAP EWM implementations, requirement gathering, solution design, configuration, testing, integration, cutover, and post-go-live support. The role requires strong functional knowledge of warehouse processes and integration with other SAP S/4HANA modules.

Job Responsibilities:

- Participate in end-to-end SAP S/4HANA EWM implementation projects.
- Conduct business requirement gathering and translate warehouse requirements into SAP EWM solutions.
- Prepare functional design documents, configuration documents, process flows, and test scenarios.
- Configure and support SAP EWM processes based on business requirements.
- Collaborate with MM, SD, and PP teams to ensure integrated warehouse processes.
- Support data migration activities using tools like LTMC/LTMOM or Migration Cockpit.

Required Skills and Qualifications:

- 4–6 years of hands-on SAP EWM consulting experience.
- Minimum experience in at least one SAP S/4HANA EWM implementation project.
- Strong understanding of warehouse and logistics business processes.
- Hands-on experience in SAP EWM configuration.
- Experience in inbound, outbound, internal warehouse processes, and physical inventory.
- Good understanding of integration between SAP EWM and MM, SD, PP, and QM.
- Experience in testing, defect management, and end-user support.
- Ability to analyze business requirements and propose standard SAP solutions.
- Good understanding of SAP Activate implementation methodology is preferred.
- Strong communication and stakeholder management skills.

Preferred Skills

- The following experience will be an added advantage:
- SAP S/4HANA Embedded EWM
- Decentralized EWM exposure
- Production integration with EWM
- RF framework / mobile warehouse processes
- Warehouse automation or MFS exposure
- Handling Unit Management

- Batch management
- Serial number management
- Advanced warehouse processes such as replenishment and staging
- SAP Fiori applications related to EWM
- Experience in multiple SAP S/4HANA project phases including implementation and rollout
