

Job Description

Role: SAP PP-QM Consultant

Location: Mumbai, India

Job Type: Full-time

About Us: Established in 2017 in the UK, Percipere is a Cloud ERP and enterprise technology consultancy operating across the UK, Middle East and India. We implement SAP Cloud ERP and Acumatica, extend solutions through our proprietary technology and AI ecosystem and support customers beyond go-live. Our expertise spans manufacturing, wholesale and distribution, finance transformation, project-led engineering and construction, and selected financial services organizations. We deliver complex, high-value transformation programmes to senior finance, operations, supply-chain and technology leaders across global markets. We have ambitious growth targets and this role will be pivotal in helping us achieve them.

Experience Required: 4-6 Years

Role Requirement: We are looking for an SAP PP-QM (Production Planning & Quality Management) Consultant with 4–6 years of hands-on experience configuring and supporting integrated production and quality processes. The ideal candidate has worked across discrete and/or process manufacturing environments, understands the tight PP-QM-MM-SD integration points, and is comfortable contributing to fit-to-standard workshops, configuration, testing, and go-live/hypercare support, ideally with S/4HANA exposure.

Job Responsibilities:

- Participate in Fit-to-Standard / Fit-Gap workshops to map manufacturing and quality business requirements to standard SAP processes.
- Configure core PP processes: material requirements planning (MRP), BOM, routing/work centers, production/process orders, order confirmation, and goods movements.
- Configure core QM processes: inspection types, inspection plans, sampling procedures, results recording, usage decisions, and quality notifications.
- Design and configure inspection lot triggers across the value chain (goods receipt, in-process, goods issue, delivery) and integrate with batch management.
- Support batch/lot management, shelf-life expiration, and batch determination, including FEFO/FIFO strategies where applicable.
- Configure Quality Certificates and Certificate of Analysis (CoA) processes for regulated or customer-mandated quality documentation.
- Collaborate with MM, SD, and FI/CO teams to ensure integrated procure-to-pay, order-to-cash, and costing flows involving inspection lots and stock postings.
- Prepare functional specifications for custom developments (forms, interfaces, enhancements) and coordinate with ABAP/technical teams.
- Drive SIT/UAT cycles, prepare test scripts, and manage defect resolution.
- Support data migration activities (e.g., BOMs, routings, inspection plans, open production orders) using tools like LTMC/LTMOM or Migration Cockpit.
- Support cutover activities and hypercare post go-live.
-

Required Skills and Qualifications:

- 4–6 years of SAP PP and QM experience, ideally spanning at least one S/4HANA implementation, rollout, or migration (On-Premise or Public/Private Cloud).
- Strong hands-on configuration experience in: MRP (classic and/or MRP Live), BOM/Routing maintenance, Production/Process Order execution, Work Center/Resource setup.

- Strong hands-on configuration in QM: inspection planning, sampling, results recording, usage decision, quality notifications (Q1/Q2/Q3), and certificate management.
- Understanding of integration points with MM (procurement/inventory), SD (delivery/quality holds), and FI/CO (product costing, WIP settlement).
- Experience with batch management, shelf-life, and expiration date handling, especially relevant for pharma and chemical industries.
- Exposure to Digital Manufacturing Cloud (DMC), MES integration, or shop-floor connectivity is a strong plus.
- Exposure to Fiori apps relevant to Manufacturing and Quality (e.g., Manage Production/Process Orders, Record Quality Inspection Results, Manage Quality Notifications).
- Familiarity with SAP Activate methodology, SSCUI-based configuration (for Public Cloud exposure), or classic SPRO/IMG configuration (for On-Premise/Private Cloud).
- Experience with data migration tools (LTMC, Migration Cockpit) is a plus.
- Strong communication skills to lead workshops and interact directly with shop-floor and quality stakeholders.

Preferred Skills

- The following experience will be an added advantage:
- SAP S/4HANA Manufacturing or Quality Management certification.
- Exposure to Variant Configuration (VC) or Repetitive Manufacturing (REM).
- Experience working in offshore-onshore delivery models with UK/US/EU clients.

Education Qualifications

- Bachelor's degree in Engineering, Manufacturing, or related field.
